.NET Full Stack Developer

10 years of technical experience in roles including Asp. Net C#, .NET Core , MVC, SQL , Angular, React, AWS, Azure and Docker Kuber native. Completed Training with self-learning on Docker, Kubernetes, RabbitMQ, Kafka Dapper Microservices, Azure Architecture Style and Redis hands-on and Implemented MVC concepts like Dependency Injection, Middle wires, Route, and Session management technique.

Major Achievements

.NET Developer
Worked on various .NET Backend Applications. Developed New Data Access Layer with Redis. Focus on Performance Optimization. New Microservices Development and Support as well.

Production Support
Production Support provided for various backend apps and Microservices with Cloud. Modifying existing logic and added new feature for business requirements. working closely with business stakeholders (such as traders) to resolve any issues with technical systems and applications.

Full Stack Developer
Created Responsive and Interactive Apps by Angular and React. Provided Production support and Implemented Data management and Smooth calling of Web Services.

Performance Optimization
Work Done on SQL, Backend API, Data Access Layer used Caching technique and Reduce Throughput of SQL Hits. Event and Object management with Garbage Collection.

Functional expertise

Asp.net C#, MVC, Angular 10, SQL Server, React Docker, Kubernetes, RabbitMQ, Kafka Dapper Microservices, Azure, AWS, Azure Architecture Style, .NET Core, Redis Dependency Injection, Middle wires, Route, Session.

Education / Certifications

Bachelor of Science in Information Technology From University of Mumbai 2014.

Rupesh Jaiprakash Singh
